Step 2

Click Next

IPop

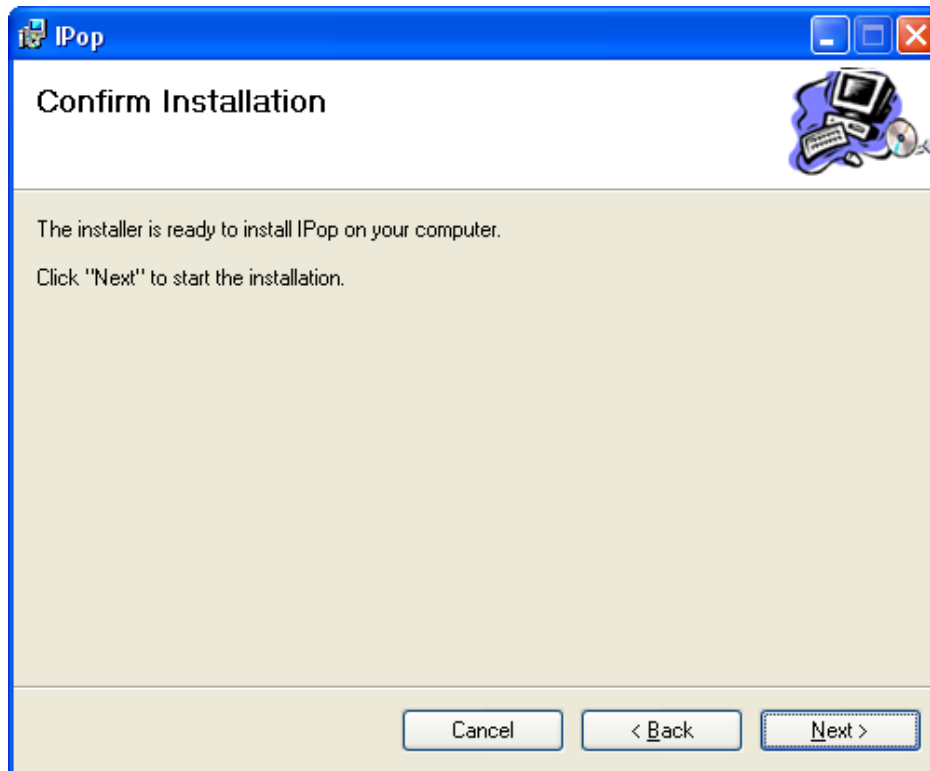

Step 3

Here you can change the installation path and if the program will appear in the start menu of everyone or the installing person.
Click Next

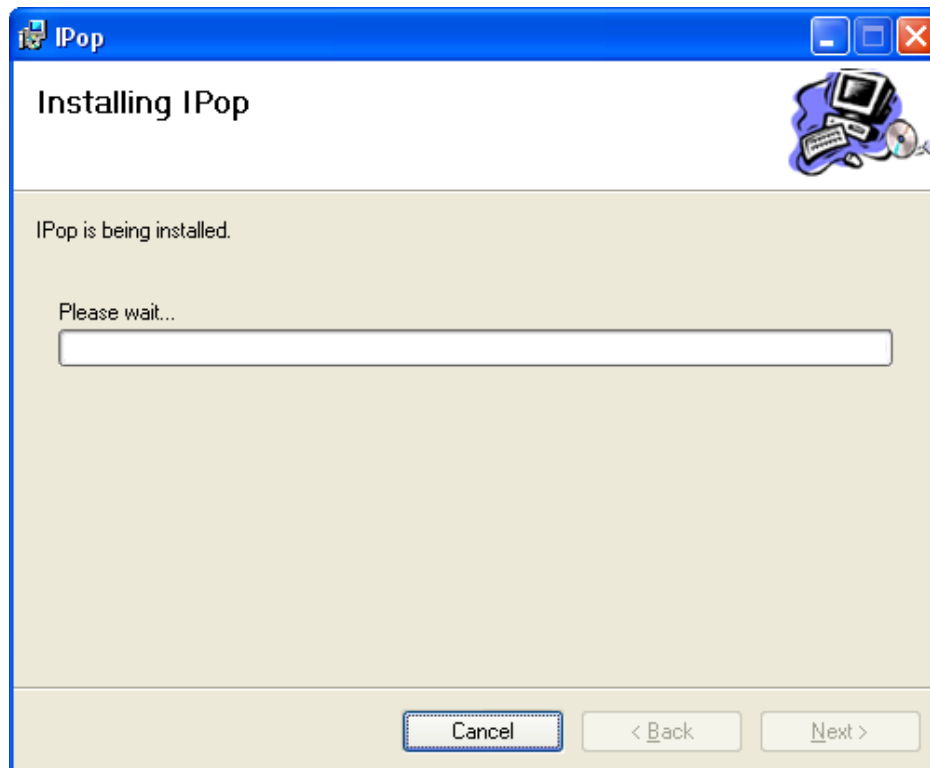

IPop

Step 4

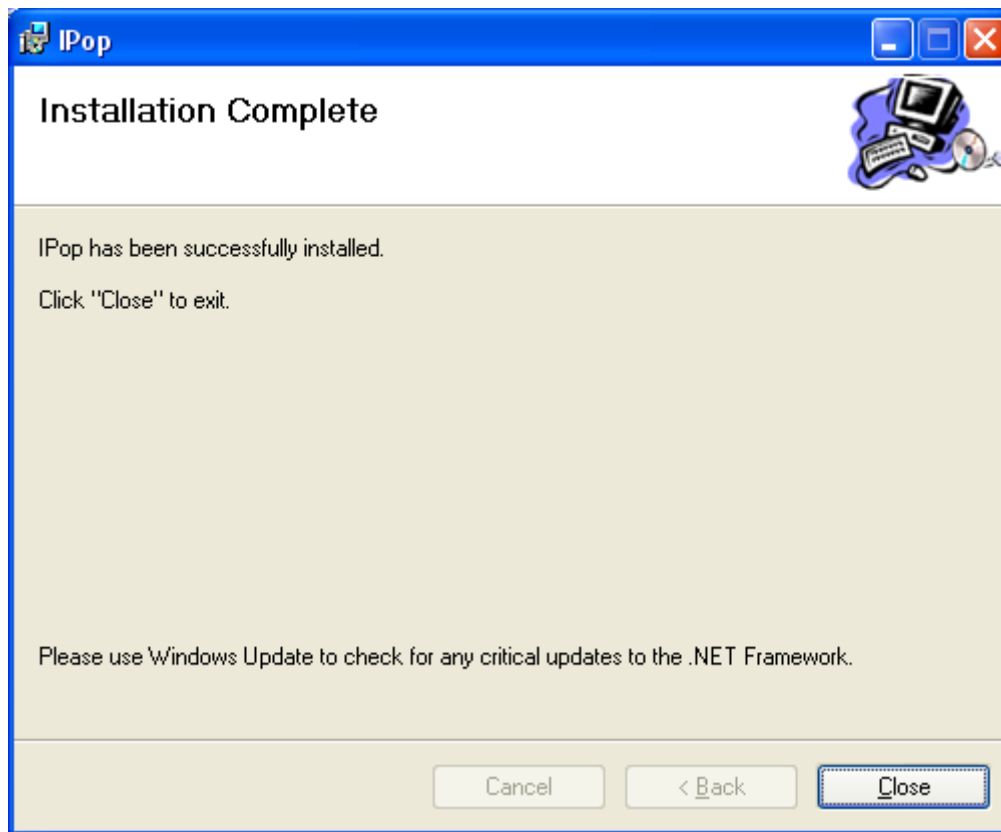

Click Next

Step 5

The IPop files are copied to the installation path.

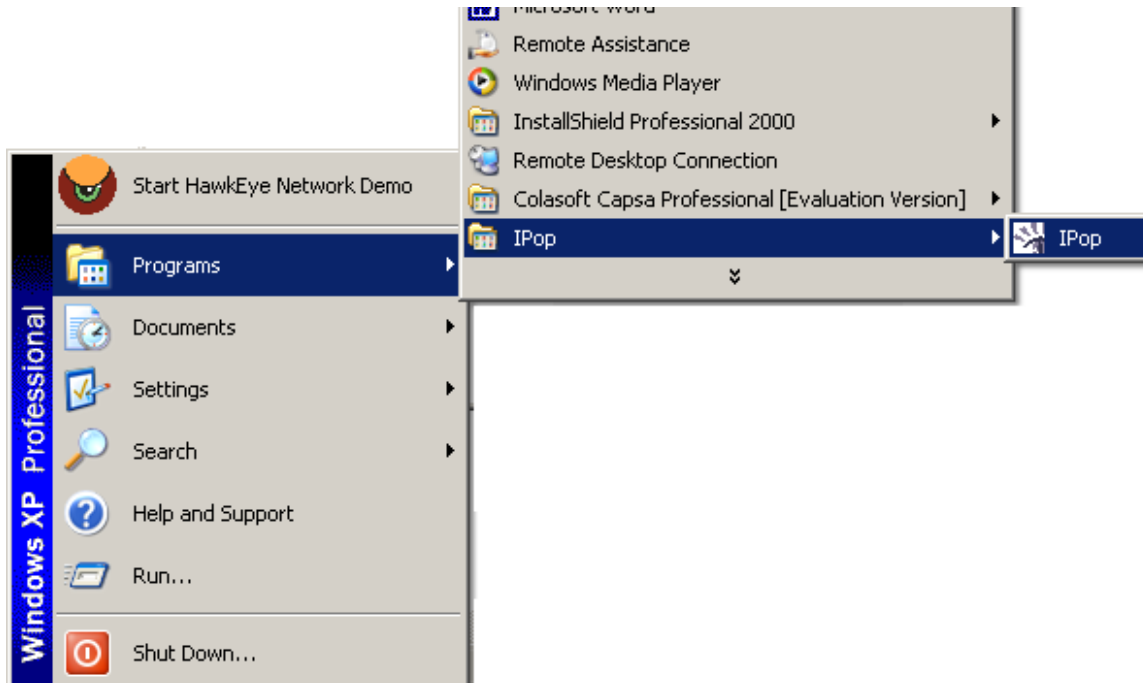

The installation has finished successfully.

Using

This section will explain how to setup and use IPop

Startup

To start IPop click on the IPop icon in the Programs\IPop folder.

IPop will be started minimized in the System Tray (next to the system time).

To configure and operate IPop, right click on the icon in the system tray. A menu is shown with the following options:

Disable

This will disable the popup events but still able to view the images

Hide

This will hide the current popup screen.

Configure

Shows a configuration setup menu in which the recorder settings and popup events can be configured

Sound Off

This will turn off the sound event on popup.

Connected/Disconnected

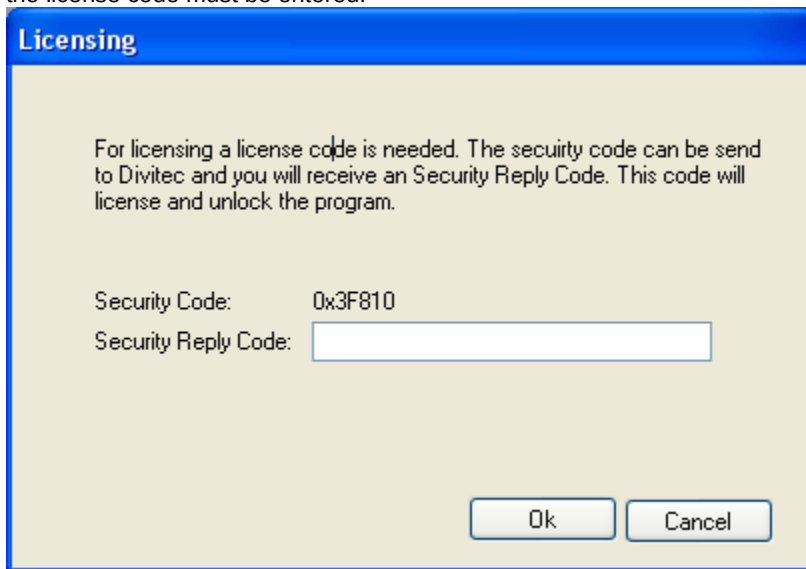

Shows the status.

Exit

Exits the program.

Licensing

While purchasing IPop you received a USB dongle and license code. When you start IPop for the first time the license code must be entered.

The image shows a 'Licensing' dialog box with a blue title bar. The main area has a light beige background. It contains a paragraph of text explaining the licensing process. Below the text, there are two labels: 'Security Code:' followed by the value '0x3F810', and 'Security Reply Code:' followed by an empty text input field. At the bottom right, there are two buttons: 'Ok' and 'Cancel'.

Licensing

For licensing a license code is needed. The security code can be send to Divitec and you will receive an Security Reply Code. This code will license and unlock the program.

Security Code: 0x3F810

Security Reply Code:

Ok Cancel

Enter the licensecode and click okay
